Signed ……………………………...............………. Date ....

Please Print Name ....

Examiner No …………..............…………. BMFA No ....

Model Details (Type, Wingspan, etc.) ....

....

		This test is for glider type electric models	Flight 1	Flight 2
	(a)	Carry out pre-flight checks as required by the BMFA Safety Codes		
	(b)	Prepare the model for launch		
	(c)	Check that the launch area and landing area are clear		
	(d)	Call "launching" and launch the model, climbing to approx. 400ft. **Switch off power**		
	(e)	Stall the model into wind and recover		
	(f)	Perform 3 consecutive 360° thermal turns to the right or left		
	(g)	Perform 3 consecutive 360° thermal turns in the opposite direction to above		
		From this point on, power should be used as required		
	(h)	Fly up wind to prepare for the overshoot/landing phase		
	(i)	Call "landing" and fly an approach		
	(j)	Overshoot from below 10 ft and climb back to circuit height		
	(k)	Call "landing" and fly an approach		
	(l)	Land the model within 20 metres of a preselected spot		
	(m)	Retrieve the model from the landing area		
	(n)	Complete post-flight checks required by the BMFA Safety Codes		
		Answer five questions from the list of mandatory questions on legal aspects of model aircraft flying. Please enter the number of the questions asked in the boxes below		
		Answer correctly a minimum of five questions on safety matters, based on the BMFA Safety Codes for General Flying and local flying
